Personal Portfolio Website - Project Details

Project:
Personal Portfolio Website
Technologies Used:
HTML5, CSS3, JavaScript (ES6+)
Difficulty Level:
Intermediate
Objective:
Build a stunning and responsive personal portfolio website to showcase your skills, projects, resume, and
contact information. This project strengthens your ability to structure content with HTML, style it with CSS
and add interactivity with JavaScript.
Pages and Features:
Home Page:
- Eye-catching landing section with:
- Your Name
- Short, strong Bio
- Profile Picture (with hover/animation)
- Smooth Navigation Bar linking to:
- About
- Projects
- Contact
- Background Animation or Hero Section

Personal Portfolio Website - Project Details

- Smooth scrolling enabled

About Page:

- Deeper introduction about you:
- Education, Passions, and Hobbies
- Journey and inspirations
- Creative storytelling style
- Animated or stylish sections
- Add professional photo with animated card effect

Projects Page:

- Showcase best work with:
 - Project Titles
- Small Descriptions
- Project Images / Videos
- Links to Live Projects / GitHub
- Well-arranged project gallery using CSS Grid/Flexbox
- Hover Effects or Modal Popups

Contact Page:

- Simple, clean contact form with fields:
- Name
- Email
- Subject
- Message
- JavaScript Form Validation

Responsive Design:

Personal Portfolio Website - Project Details

- Ensure responsiveness using Media Queries
- Flexible layouts for Desktop, Tablet, Mobile

Navigation:

- Smooth Scrolling
- Highlight active section in Navbar

Interactivity:

- Hover effects on buttons and images
- JavaScript features like image sliders or modals

Style and Layout:

- Clean Typography
- Modern Color Schemes
- Balanced Spacing and Layout

Resume:

- Provide a downloadable PDF version of your resume
